Potter's wheel was in use
in Asia Minor

8,500 yrs ago = 6,500 BC

Ceramic (with pots) Neolithic
Age

c. 6,500 B.C.

A small scratched bone was found at ISHANGO, a Stone Age site at the headwaters of the NILE in Central Africa. It dated from about 6500 B.C.

It was a calendar (MARSBACK says) with the marks representing numbers of days for successive lunar phases from the first Crescent of a new moon.
